Advancing Workforce Equity in Bay Area

National Equity Atlas
AS THE BAY AREA GROWS MORE DIVERSE, RACIAL EQUITY IS A CRITICAL PRIORITY
Nearly three out of five workers in the Bay Area region are people of color.

Source: Authors’ analysis of the 2018 5-year American Community Survey microdata from IPUMS USA. Note: Universe of emerging workforce includes all people under the age of 25 years, while the current workforce includes the employed population between the ages of 25 and 64 years.
The region's GDP could be $348 billion (37 percent) larger if racial gaps in income were eliminated.

Actual GDP and Estimated GDP with Racial Equity in the Workforce ($ Billions), Nine-County Bay Area, 2018

- GDP in 2018
- GDP if racial gaps in income were eliminated

Equity dividend: $348.0 billion

Source: Authors' analysis of the 2018 5-year American Community Survey microdata from IPUMS USA. Note: Universe includes the population ages 25–64 years. Data reflect a 2014–2018 average. Values are in 2018 dollars. See the methodology for details on the analysis.
Racial equity would nearly double the average incomes of people of color, from about $59,000 to more than $113,000 per year.

Annual Income Gains with Racial Equity in the Workforce, Nine-County Bay Area, 2018

- **Average income**
  - Black: $45,195
  - Latinx: $41,431
  - Asian or Pacific Islander: $74,395
  - Native American: $49,590
  - Mixed/other: $69,054
  - People of color: $59,007

- **Average income with racial equity**
  - Black: $113,210
  - Latinx: $113,194
  - Asian or Pacific Islander: $113,665
  - Native American: $114,296
  - Mixed/other: $113,269
  - People of color: $113,427

Source: Authors’ analysis of the 2018 5-year American Community Survey microdata from IPUMS USA. Note: Universe includes the population ages 25–64 years. Data reflect a 2014–2018 average. Values are in 2018 dollars. See the methodology for details on the analysis.
THE REGION’S PROSPERITY IS NOT EQUITABLY SHARED
Low-wage jobs have grown twice as fast as middle-wage jobs over the past three decades.

Growth in Jobs and Earnings by Wage Level, Nine-County Bay Area, 1990–2018

- Low-wage
- Middle-wage
- High-wage

Jobs: 50% Low-wage, 25% Middle-wage, 38% High-wage

Earnings per worker: 51% Low-wage, 44% Middle-wage, 149% High-wage

Occupational segregation remains a significant challenge for achieving workforce equity.

**Occupational Groups by Race/Ethnicity, Nine-County Bay Area, 2018**

- **White**
- **Black**
- **Latinx**
- **Asian or Pacific Islander**
- **Native American**
- **Mixed/other**

The diagram illustrates the distribution of occupations across different racial and ethnic groups. The occupations are categorized based on their type, such as Management, Health-Care Practitioners and Technical, and Construction Trades.

**Source:** Authors' analysis of the 2018 5-year American Community Survey microdata from IPUMS USA. **Note:** Universe includes the employed population ages 25–64 years. Data reflect a 2014–2018 average.
Roughly nine in 10 White workers earn at least $15/hour, but just 62 percent of Latinx immigrants are paid this basic wage.

**Share of Workers Earning at Least $15/Hour by Race/Ethnicity and Nativity, Nine-County Bay Area, 2018**

- **White**: 92%
- **Black, US-born**: 80%
- **Black, Immigrant**: 78%
- **Latinx, US-born**: 80%

Source: Authors’ analysis of the 2018 5-year American Community Survey microdata from IPUMS USA. Note: Universe includes the population ages 25–64 years. Data reflect a 2014–2018 average.
Higher educational attainment narrows racial gaps in employment, but benefits too few workers of color.

Joblessness by Educational Attainment, Race/Ethnicity, and Nativity, Nine-County Bay Area, 2018

Source: Authors’ analysis of the 2018 5-year American Community Survey microdata from IPUMS USA. Note: Universe includes the civilian noninstitutionalized population ages 25–64 years. Joblessness is defined as those unemployed or not in the labor force as a share of the total population. Data reflect a 2014-2018 average. Data for Native American workers are not available because of small sample size.
Black and Latinx workers earn substantially less than their White counterparts at every level of educational attainment.

Median Hourly Wages by Educational Attainment and Race/Ethnicity, Nine-County Bay Area, 2018

- White
- Black
- Latinx
- Asian or Pacific Islander
- Mixed/other

Less than a HS diploma:
- White: $20
- Black: $17
- Latinx: $15
- Asian or Pacific Islander: $15

HS diploma, no college:
- White: $25
- Black: $19
- Latinx: $19
- Asian or Pacific Islander: $19

Some college, no degree:
- White: $31
- Black: $23
- Latinx: $22
- Asian or Pacific Islander: $24

AA degree, no BA:
- White: $32
- Black: $24
- Latinx: $25
- Asian or Pacific Islander: $26

BA degree or higher:
- White: $48
- Black: $36
- Latinx: $35
- Asian or Pacific Islander: $41

Source: Authors’ analysis of the 2018 5-year American Community Survey microdata from IPUMS USA. Note: Universe includes civilian noninstitutionalized full-time wage and salary workers ages 25–64 years. Data reflect a 2014–2018 average. Values are in 2018 dollars. Data for Native American workers, and for mixed/other race workers at certain educational levels, are not available because of small sample size.
GEOGRAPHIC AND POLITICAL BARRIERS CURTAIL WORKER POWER
More than half of Black women and Latina renters are both rent burdened and economically insecure.

Share of Renters Who are Both Rent Burdened and Economically Insecure by Race/Ethnicity and Gender, Nine-County Bay Area, 2018

- **White**
  - Male: 25%
  - Female: 33%

- **Black**
  - Male: 44%
  - Female: 59%

- **Latinx**
  - Male: 46%

The early labor market recovery has been concentrated in jobs that require only some preparation and training. Postings for jobs requiring more formal education, training, and experience remain down significantly from the February 2020 baseline.

Monthly Job Postings by Degree of Preparation Required, Nine-County Bay Area, February–October, 2020

Source: Authors’ analysis of Burning Glass Technologies data on monthly job postings, using O*NET occupational classifications. Note: For more information on job zone definitions, see https://www.onetonline.org/help/online/zones.
GOOD JOBS ARE THE CORNERSTONE OF WORKFORCE EQUITY
### Characteristics and Examples of Stable Jobs by Typical Education Requirements, Bay Area, 2019

#### Characteristics of stable jobs:
- Living-wage compensation: Average annual wage for the occupation is sufficient to sustain a working family—$47,362 each for two full-time workers in a household of four, in the Bay Area.  
- Strong or growing base of employment: The number of jobs is projected to grow or to remain relatively stable for the next decade—employment in the occupation is not declining by more than 10 percent over 10 years, or more than 2 percent over 10 years for small occupations. 
- Automation resilient: The occupation has a probability of computerization lower than 50 percent, given the full array of tasks that comprise the role and assuming that the current course of corporate-driven trends in automation continues. Automation risk is best calculated in terms of the likelihood of computerization of the underlying tasks that make up a given occupation, which can lead to worker displacement. Very few jobs consist entirely of tasks that can be computerized, but most occupations include enough automatable tasks to be considered at risk of automation. The national average risk is about 52 percent, indicating that about half of job tasks performed by the US workforce can be automated.

#### Example occupations accessible to workers with a high school diploma or less:
- First-line supervisors of retail sales workers 
- First-line supervisors of nonretail sales workers 
- Sales representatives of services, except advertising, insurance, financial services, and travel

#### Example occupations accessible to workers with a postsecondary certificate, license, or vocational training through an apprenticeship:
- Electricians 
- Plumbers, pipefitters, and steamfitters 
- Emergency medical technicians

#### Example occupations accessible to workers with an associate's degree:
- Registered nurses 
- Surveyors, cartographers, and photogrammetrists 
- Air traffic controllers and airfield operations specialists

#### Example occupations accessible to workers with a bachelor's degree or higher:
- Elementary and middle school teachers 
- Software developers 
- Civil engineers
Just under half of Bay Area workers are in stable jobs.

Share of Workers in Stable Jobs, Overall and by Educational Requirements, Nine-County Bay Area, 2019

- Overall: 47%
- High school diploma or less: 12%
- Postsecondary certificate, license, or apprenticeship: 27%
- Associate’s degree: 65%
- Bachelor’s degree or more: 83%

Sources: Employment from 2018 5-year American Community Survey microdata from IPUMS USA, and occupational characteristics from Burning Glass job posting data and 2018 5-year American Community Survey microdata from IPUMS USA.
White workers are particularly overrepresented in stable jobs while Black and Latinx workers are underrepresented.

About the National Equity Atlas: America’s most detailed report card on racial and economic equity.

A partnership between PolicyLink and the USC Equity Research Institute, the National Equity Atlas:

- produces innovative research to inform the field and influence policy debates;
- partners with community organizations to create tailored analyses that advance local campaigns; and
- democratizes access to equity data.
About Burning Glass Technologies

Burning Glass Technologies is an analytics software company that has cracked the genetic code of an ever-changing labor market.

Powered by the world’s largest and most sophisticated database of labor market data and talent, we deliver real-time data and breakthrough planning tools that inform careers, define academic programs, and shape workforces.

Burning Glass data have been built over 15 years with robust taxonomies and the industry’s largest in-house data science team.

- **3.4 million**: Active unique jobs collected daily
- **50,000**: Sources across the web - job boards and corporate sites
- **>1 million**: Firms represented, from large corporations to SME’s
- **Dynamic Labor Market Taxonomy**
  - 23 Career Areas
  - 1700 Occupations
  - 18,000 Skills
  - 60,000 Skill Variants
- **80%**: Deduplication ensuring integrity and consistency
- **300 million**: Resumes processed per annum
- **>1 billion**: Historical job market records
