The National Equity Atlas is America's most detailed report card on racial and economic equity, produced through a partnership between PolicyLink and the USC Equity Research Institute. We equip movement leaders and policymakers with actionable data and strategies to advance racial equity and shared prosperity.
Contents

Demographics
  Race/ethnicity  5  Youth incarceration  18
  Racial generation gap  6  Children with 2+ ACEs  19

Economic Vitality
  Working poor  8  COVID-19 vaccination rates  20
  Unemployment  9  Voter registration and turnout  21
  Business ownership  10
  Income growth  11
  Extreme economic insecurity  12

Readiness
  Educational attainment  14
  Student debt  15
 Disconnected youth  16
  School poverty  17

Connectedness
  Air pollution exposure  23
  Car access  24
  Housing burden  25
  Rent debt  26
  Neighborhood poverty  27
  Residential segregation  28

Economic Benefits
  GDP gains  30
  Racial equity in income  31
People of color now make up 40 percent of the state’s population, compared to 25 percent in 1980

Race/ethnicity, North Carolina, 1980-2020

Source: Child Trends analysis of data from the U.S. Department of Health and Human Services, Health Resources and Services Administration, Maternal and Child Health Bureau, National Survey of Children’s Health.

Adverse childhood experience, also known as ACEs, are potentially traumatic events that occur in childhood (0-17 years). ACEs are linked to chronic health problems, mental illness, and substance use problems in adulthood. ACEs can also negatively impact education, job opportunities, and earning potential.

Children were included if the respondent answered that the child had ever experienced two or more of the following adverse experiences: frequent socioeconomic hardship, parental divorce or separation, parental death, parental incarceration, family violence, neighborhood violence, living with someone who was mentally ill or suicidal, living with someone who had a substance abuse problem or racial bias.
Asian residents have the highest COVID-19 vaccination rates in the state by far

Percent of population that has received at least one COVID-19 vaccine dose by race/ethnicity, North Carolina, December 2021

- White: 56%
- Black: 53%
- Latino: 55%
- Asian: 85%

Source: Kaiser Family Foundation (KFF) analysis of publicly available data on state websites; total population data used to calculate rates based on KFF analysis of 2019 American Community Survey data. Note: States vary in whether they include or exclude Hispanic people from their racial groups and in their racial classifications. Total population data used to calculate rates is matched to each states’ racial classification approach. Rates may not match those reported on state websites due to differences in the source for total population data and/or ages included in the total population.
Just half of the state’s Latino citizens voted in 2020

Percent of citizens who are registered and voted by race/ethnicity, North Carolina, November 2020

Source: Table 4b from the Census Bureau's data on Voting and Registration in the Election of November 2020.
Native American residents are slightly more likely to live in neighborhoods with high exposure to air toxins.

Roughly 207,000 households (or 17 percent of renters) are behind on rent, and 68 percent are people of color.

Percent of households behind on rent, North Carolina, 2021

...who are people of Color

68%

...who have incomes <$50k

90%

Twenty percent of Native American residents and 17 percent of Black residents live in high-poverty neighborhoods.

Source: National Equity Atlas analysis of the 2019 five-year American Community Survey microdata from IPUMS USA.
Race and class segregation remains very high across the state, particularly in Cumberland, Forsyth, and Wake Counties.

Index of concentration at the extremes for racialized economic segregation, North Carolina, 2019

Source: National Equity Analysis of the 2019 American Community Survey five-year estimates. Note: Census tracts with less than 100 households were excluded (in grey).
Race (Latino-white) and class segregation is not as pronounced but still high near Charlotte and Winston-Salem

Index of concentration at the extremes for racialized economic segregation, North Carolina, 2019

Segregated low-income Latino households
Segregated high-income white households

Source: National Equity Analysis of the 2019 American Community Survey five-year estimates. Note: Census tracts with less than 100 households were excluded (in grey).
Economic Benefits
If there had been no racial gaps in income in 2019, the state GDP would have been about $82 billion larger.

Actual GDP and estimated GDP with racial equity in income (billions), North Carolina, 2019

Source: National Equity Atlas analysis of the 2019 five-year American Community Survey microdata from IPUMS USA.
With racial equity in wages and employment, average incomes for Latinos and Native Americans would grow by 75 percent.

Source: National Equity Atlas analysis of the 2019 five-year American Community Survey microdata from IPUMS USA.
Data Notes

Data for 2010 and 2019 represent five-year averages (i.e., 2006-2010 and 2015-2019).

Data for certain race/ethnicity categories are excluded due to small sample size of survey respondents.

High-poverty neighborhoods are defined as census tracts with a poverty rate of 30 percent or higher.

Housing burden is defined as renter-occupied households that are spending more than 30 percent of income on housing costs.

High-poverty schools are defined as public elementary and secondary schools with 75% or more students eligible for free or reduced-price lunch.

Working poor is defined as those who work full-time and have a family income below 200 percent of the federal poverty level.
