About the Atlas

The National Equity Atlas is America's most detailed report card on racial and economic equity, produced through a partnership between PolicyLink and the USC Equity Research Institute. We equip movement leaders and policymakers with actionable data and strategies to advance racial equity and shared prosperity.
## Contents

### Demographics
- Race/ethnicity 5
- Racial generation gap 6

### Economic Vitality
- Working poor 8
- Unemployment 9
- Business ownership 10
- Income growth 11
- Extreme economic insecurity 12

### Readiness
- Educational attainment 14
- Student debt 15
- Disconnected youth 16
- School poverty 17

### Connectedness
- Youth incarceration 18
- Children with 2+ ACEs 19
- COVID-19 vaccination rates 20
- Voter registration and turnout 21

### Economic Benefits
- GDP gains 30
- Racial equity in income 31

Half of all students of color attend high-poverty schools – more than three times the rate of white students

Percent of students in high-poverty public schools, Tennessee, 2010-2016

Black youth are more than four times as likely as white youth to be incarcerated

Youth incarceration rate per 100,000 juveniles by race/ethnicity, Tennessee, 2019

All: 50
White: 27
Black: 124
Latino: 42
Asian or Pacific Islander: 19

Black children are nearly twice as likely as white children to experience two or more adverse childhood experiences

Source: Child Trends analysis of data from the U.S. Department of Health and Human Services, Health Resources and Services Administration, Maternal and Child Health Bureau, National Survey of Children’s Health.

Note: Children were included if the respondent answered that the child had ever experienced two or more of the following adverse experiences: frequent socioeconomic hardship, parental divorce or separation, parental death, parental incarceration, family violence, neighborhood violence, living with someone who was mentally ill or suicidal, living with someone who had a substance abuse problem or racial bias.

Adverse childhood experience, also known as ACEs, are potentially traumatic events that occur in childhood (0-17 years). ACEs are linked to chronic health problems, mental illness, and substance use problems in adulthood. ACEs can also negatively impact education, job opportunities, and earning potential.
Asian and Latino residents have the highest COVID-19 vaccination rates in the state

Percent of population that has received at least one COVID-19 vaccine dose by race/ethnicity, Tennessee, December 2021

- **White**: 46%
- **Black**: 42%
- **Latino**: 59%
- **Asian**: 59%

Source: Kaiser Family Foundation (KFF) analysis of publicly available data on state websites; total population data used to calculate rates based on KFF analysis of 2019 American Community Survey data. Note: States vary in whether they include or exclude Hispanic people from their racial groups and in their racial classifications. Total population data used to calculate rates is matched to each states' racial classification approach. Rates may not match those reported on state websites due to differences in the source for total population data and/or ages included in the total population.
In the November 2020 election, 69 percent of Black citizens voted compared with 41 percent of Latino citizens.

Percent of citizens who are registered and voted by race/ethnicity, Tennessee, November 2020

Source: Table 4b from the Census Bureau's data on Voting and Registration in the Election of November 2020.
Connectedness
Black residents are slightly more likely to live in neighborhoods with high exposure to air toxins

Air pollution exposure index by race/ethnicity, Tennessee, 2019

Source: National Equity Atlas analysis of National Air Toxics Assessment data from the U.S. Environmental Protection Agency
Nearly one in eight Black households in Tennessee lack access to a vehicle

Source: National Equity Atlas analysis of the 2019 five-year American Community Survey microdata from IPUMS USA.
58 percent of households headed by Black women are paying more than 30 percent of their income for rent

Rent burden by race/ethnicity and gender, Tennessee, 2019

Source: National Equity Atlas analysis of the 2019 five-year American Community Survey microdata from IPUMS USA.
Roughly 113,000 households (or 15 percent of renters) are behind on rent, and 49 percent are people of color.

Black residents are more than six times as likely as white residents to live in high-poverty neighborhoods

Percent living in high-poverty neighborhoods by race/ethnicity, Tennessee, 2019

- All: 9%
- White: 4%
- Black: 27%
- Latino: 13%
- Asian or Pacific Islander: 6%
- Native American: 8%
- Mixed/other: 9%
- People of color: 21%

Source: National Equity Atlas analysis of the 2019 five-year American Community Survey microdata from IPUMS USA.
CONNECTEDNESS

Race and class segregation remains very high across the state, particularly in Nashville and Memphis

Index of concentration at the extremes for racialized economic segregation, Tennessee, 2019

Segregated low-income Black households
Segregated high-income white households

Source: National Equity Analysis of the 2019 American Community Survey five-year estimates. Notes: The index ranges from -1, signifying that the census tract is comprised only of low-income Black households and 1, signifying that the census tract is comprised only of high-income white households. Census tracts with less than 100 households were excluded (in grey).
Economic Benefits
If there had been no racial gaps in income in 2019, the state GDP would have been about $28 billion larger.

Actual GDP and estimated GDP with racial equity in income (billions), Tennessee, 2019

Source: National Equity Atlas analysis of the 2019 five-year American Community Survey microdata from IPUMS USA.
Black and Latino residents would see the largest income gains with racial equity in employment and wages

Income by race/ethnicity, Tennessee, 2019

- **Average income**
- **Average income with racial equity**

Source: National Equity Atlas analysis of the 2019 five-year American Community Survey microdata from IPUMS USA.
Data Notes

Data for 2010 and 2019 represent five-year averages (i.e., 2006-2010 and 2015-2019).

Data for certain race/ethnicity categories are excluded due to small sample size of survey respondents.

High-poverty neighborhoods are defined as census tracts with a poverty rate of 30 percent or higher.

Housing burden is defined as renter-occupied households that are spending more than 30 percent of income on housing costs.

High-poverty schools are defined as public elementary and secondary schools with 75% or more students eligible for free or reduced-price lunch.

Working poor is defined as those who work full-time and have a family income below 200 percent of the federal poverty level.
